You will be contacted again once appropriate action has been identified by the Council.

It is not a criminal offence to do something without planning permission. Officers are not empowered to physically stop unauthorised works. During our first contact with the property owner, we include a recommendation that any work is ceased, and confirmation that any continued activity is entirely at their own risk. However, their co-operation clearly cannot be guaranteed.

Thank you for your assistance, if you require further information please contact the Council quoting the case reference and location address in this correspondence.

Yours faithfully

Mick Laidlaw
